

KANAK VERMA

FULL STACK DEVELOPER | AI/ML ENGINEER | B.TECH DATA SCIENCE

7983639253 | kanak0205mbd@gmail.com | Moradabad, UP | GitHub: github.com/kanak-verma-developer

LinkedIn: linkedin.com/in/kanak-verma-b50730368

PROFESSIONAL SUMMARY

Full Stack Developer and B.Tech Data Science student with hands-on experience building responsive web applications and AI-powered products. Strong foundation in Python, JavaScript, React.js, Node.js, Flask, REST APIs, SQL, Git/GitHub and Microsoft Azure, with project experience in AI/ML, computer vision and RAG-based applications. Seeking software development, full stack development or AI/ML opportunities.

TECHNICAL SKILLS

- Languages: Python, JavaScript, HTML5, CSS3
- Frontend: React.js, Tailwind CSS, Responsive Design
- Backend: Flask, Node.js, Express.js, REST APIs
- Database: SQL, SQLite3
- AI/ML: YOLOv8, OpenCV, RAG, NLP, Machine Learning
- Cloud & Tools: Microsoft Azure, Git, GitHub, Pega, VS Code

INTERNSHIP EXPERIENCE

Frontend Developer Intern — IBM (via AICTE), Remote

Aug 2025 – Oct 2025

- Developed 5+ responsive web application modules using React.js, Tailwind CSS and JavaScript, improving UI consistency across 3 workflows.
- Integrated frontend components with 8+ REST API endpoints and resolved 10+ cross-team issues in an Agile development environment.
- Used Git and GitHub for collaborative source-code management and earned the IBM Web Development Fundamentals Badge.

Cloud Computing Intern — Microsoft Elevate (via AICTE), Remote

Mar 2025 – May 2025

- Configured and tested virtual machines, storage and resource groups on Microsoft Azure across multiple cloud services.
- Worked with Azure resource lifecycle management, deployment configuration and cloud infrastructure fundamentals.
- Completed all program milestones and received the Microsoft Azure Internship Certificate.

PROJECTS

CarbonIQ — AI Carbon Footprint Chatbot

Python | Flask | IBM Granite NLP | RAG | JavaScript

- Built a full-stack AI chatbot with Flask, RAG-based knowledge retrieval and NLP across 10+ carbon-related domains.
- Optimized retrieval over a 500+ entry knowledge base to keep average query response time under 2 seconds.
- Added voice interaction and a responsive 3D Earth/particle visualizer.
- Live Demo: carboniq-6j7c.onrender.com

AI Smart Queue Management System

Python | YOLOv8 | OpenCV | Streamlit | SQLite3

- Built a real-time people-detection pipeline using YOLOv8 and OpenCV, processing live camera feeds at 20+ FPS in testing.
- Developed a Streamlit dashboard for live statistics, trends and historical queue data with automated PDF and CSV reporting.
- Implemented SQLite-based audit trails and automated queue monitoring for multiple people in a frame.

HeatShield AI — Heat-Risk Intelligence Platform

Python | Machine Learning | Flask | React | REST API

- Built an AI-powered platform delivering environmental heat-risk insights, predictions and actionable recommendations.
- Started with a rule-based risk-scoring engine, then layered a trained ML model on top for improved prediction accuracy.
- Connected a Flask backend to a React frontend via REST APIs for real-time risk visualization.

EDUCATION

B.Tech — Data Science

Moradabad Institute of Technology, Uttar Pradesh

2023 – 2027 | CGPA: 7.0+

CERTIFICATIONS

- Introduction to Data Science & Python for Data Science and AI — IBM (Coursera)
- App Development on Pega Platform — Pega Academy
- Microsoft Azure Internship Certificate — Microsoft Elevate (AICTE)
- Web Development Fundamentals Badge — IBM (AICTE)

ACHIEVEMENTS & LEADERSHIP

- 1st Prize — Web Crackers Competition, MIT Tech Club (2026)
- Team Lead for a major campus-intelligence project, coordinating design, development and delivery.
